What we do

MJY Security Systems is a family run security systems company based in Towcester, Northamptonshire. Using the latest innovative technology to design, install and maintain CCTV, Access Control, Intruder Alarms, Fire Alarms, Gate/Barrier Automation and Electrical Services.

As a company, we have rapidly gained recognition for our quality of work in the domestic and commercial market. As a result, most of our new work arises from recommendations from existing satisfied customers.

Committed to providing the latest technology in security systems

Security

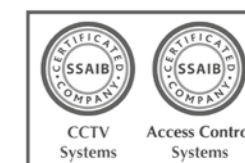

Our innovative security solutions include CCTV, fully-customisable to record when motion is detected. We can also integrate your security system with other aspects of your automation set-up too, such as programming occupancy simulation light routines when you're away, complete with movement sensors that trigger light sequences.

CCTV

Our systems can be fully integrated, offering digital imagery, fully functional high resolution cameras with low light capability, Infrared Imaging & hard disk recording. Which can also be securely accessed remotely by you anywhere in the world with internet access.

ACCESS CONTROL

MJY Security's approach to access control is to keep unhindered access to staff but also keeping all facilities fully secure to unwelcome personnel. Our systems can use the latest biometric key-less technology, which is PC compatible. We also cover automated barriers, gates, turnstiles and the latest advanced locking systems.

Building secure spaces for your business and protecting your investment

Intruder Alarms

Our intruder alarms are designed and developed for compliance with the latest European standards, with integration to all security disciplines available. Installations are carried out by our in-house engineers and backed up by our on-call service department. Our alarms can offer data transmission, event logging and rapid response.

Your security cameras can be viewed remotely, any time, from anywhere in the world with internet access. Alerts can be received when someone enters the property, or a door is left open. Intelligent security puts peace of mind at your fingertips so you can rest assured all is safe.

Our fully trained SSAIB approved installers provide 24 hour call out facility for both domestic & business premises. Security taken seriously, a service you can rely on.

Building secure spaces for your business and protecting your investments

Fire Alarm Systems

Protecting people and assets, business processes and continuity are core aspects of fire alarm systems.

This is an area where our knowledge of fire safety regulations is essential. Our in-house team can tailor systems and engineer solutions to suit most bespoke requirements.

MJY Security's expertise can provide a fully certified design and installation service for all types of fire detection, alarm and suppression systems in full compliance with both British and European standards.

Prepared for any unfortunate possibilities that may appear.

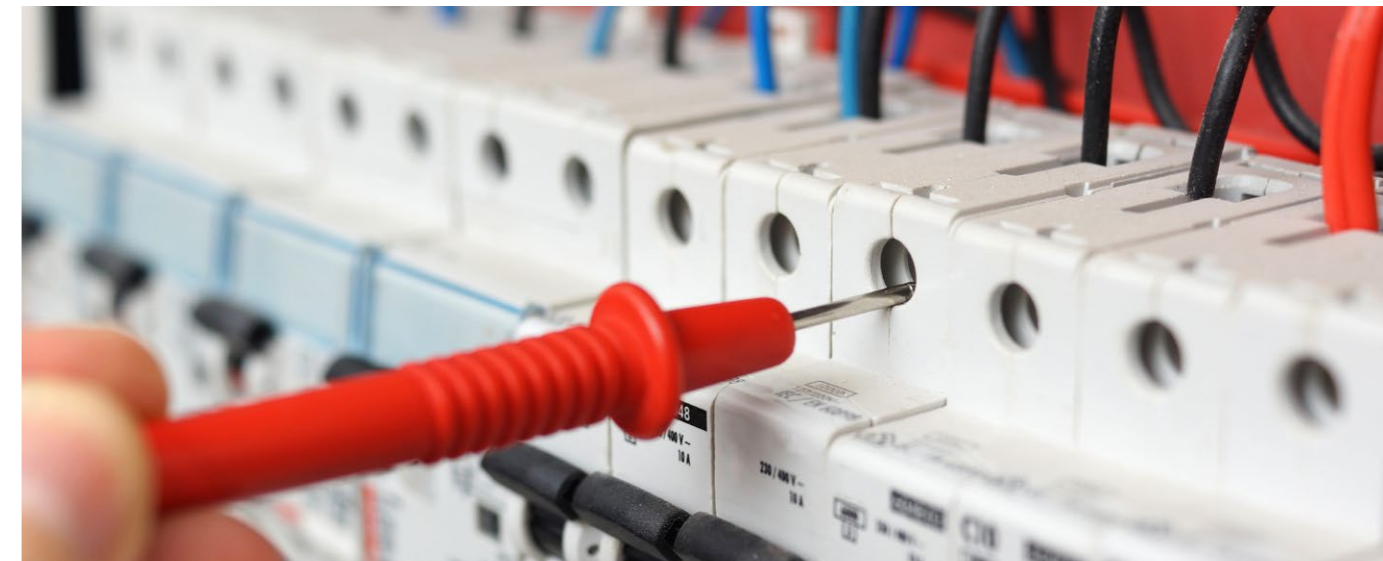

Fire Extinguishers

Fire extinguishers are a legal requirement for all commercial buildings here in the UK and should ideally be stocked appropriately for a number of different types of fire that may occur in a specific place. A fire extinguisher can grant peace of mind in the workplace or home. The presence of the right type of extinguisher can leave you assured that you are prepared for any unfortunate possibilities that may appear.

Our extensive knowledge of the types of fire possible and the correct extinguisher to use on each. Comparing that to potential hazards that you may encounter, will allow us to advise you on which extinguisher, or extinguishers, you should have in your building.

There are six recognised fire classes and we at MJY Security Systems can supply extinguishers for all classes of fires (Class A - F).

- **Class A Fires:** Solid combustibles, such as wood, paper, textiles
- **Class B Fires:** Flammable liquids, such as petrol, diesel and paraffin
- **Class C Fires:** Flammable gases, such as LPG and natural gas
- **Class D Fires:** Flammable metals, such as magnesium swarf
- **Class F Fires:** Cooking fats, such as deep fat fryers oils

Smarter energy and electrical safety to maximise efficiency and reduce carbon footprint

Electrical Services

Here at MJY, we are experienced in domestic installations, repairs, replacement work. For commercial premises we can design and complete retrofit projects to set specifications, or design & build from site surveys. We can provide a solution for most projects that you may have, whether you are looking for a small residential repair or an industrial warehouse overhaul.

We provide a start-to-finish service to all our projects, providing recommendations throughout the process as how best to reduce your carbon footprint, reducing your power, consumption and in turn your electricity bills.

Our electrical services include:

- **Emergency light testing**
- **Portable appliance testing (PAT)**
- **New installations/builds**
- **Minor works**
- **Residential rewiring project**
- **Commercial services**
